

Hello Neighbors,

In case you didn't notice, the HOA Zelkova trees in the center of Flintrock were not looking too good this Spring. So, the Grounds Committee, with the approval of the Board, engaged Bartlett Tree Service to investigate their condition and to take the appropriate steps to promote their health. Bartlett worked on the trees on 5/22/2020 to loosen up the roots, take a root and soil sample to see if they are diseased, and to fertilize the trees. We will know more when the test results are back. We sure hope that we can help the trees return to health and avoid the cost of replacements!
