Greetings Owners of dams in Virginia,
VLWA is having another Dam Owner Training coming up and we are letting as many of you know as we can.
If you know of someone else in yours or another organization that you think would also like to attend this event please forward this invitation to them.

**Dam Owner Training for Virginia Dam Owners
FREE TRAINING on ZOOM
Sponsored by the Virginia Lakes and Watershed Association (VLWA)**

**September 4, 2021 - 10:00 a.m. to 4:30 p.m.
One hour break for lunch (presenters questions and general
discussion for most of this**

On Saturday September 4, 2021, the VLWA Dam Safety Committee (cc list above) will present a Dam Owner Training session. If you have questions about your dam, Dam Safety operation and maintenance practices, dam engineering studies and designs, or the VA DCR Dam Safety regulations then we encourage you to sign up for this event.
Several Dam Safety professionals from Virginia engineering firms that are actively working on Virginia dams will provide educational sessions on all aspects of the operation and maintenance of dams in Virginia and the

regulations that govern them. If you cannot attend please forward this to someone that can attend on behalf of your dam and also to other dam owners that may not be included above so that they may benefit this informative class.

Feedback from the March 2021 class expressed an interest in more training on Emergency Action Plans (EAP) and Tabletop exercises for this event, so this time we will be covering more in depth on EAPs, tabletops, and drills.

Please Register via email to our Dam Safety Committee chairman, David Krisnitski at his email: DKrisnitski@amtengineering.com and we will email a ZOOM invitation to you with instructions on how to log in with some additional class information.

You are encouraged to send questions in advance of the event to Tom Roberts at his email address: tomroberts@h2r-inc.com and Tom requests that you indicate in the subject line “Question for Dam Owner Training”. The method for asking questions during the event will be provided to registered attendees with the agenda and the ZOOM invitation. Attendees will not need computer cameras and microphones, but this event may be watched on your computer screen with your computer’s speakers.

The Virginia Lakes and Watershed Association is a volunteer organization and its mission is to provide education on water resources in Virginia. Dam Safety is one of those important water resource areas and VLWA is sponsoring this event.

We will likely be holding Dam Owner Training in March 2022 at the VLWA Annual Conference and we hope by then we can see you again in person! The VLWA website is: www.vlwa.org

Thank you for your interest in keeping your dams safe.

David A. Krisnitski, P.E., CFM – VLWA Treasurer, VLWA Dam Committee Chair
